Education

Indian Institute of Information Technology, Nagpur

August 2019 - June 2023

Bachelor of Technology in Electronics and Communication Engineering

Nagpur, India

Experience

EDUREKA

Full Stack Web Development Internship

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, and React.
- Enhanced front-end components with Tailwind CSS to ensure consistent and modern UI designs.
- Implemented and debugged complex JavaScript functionality to improve site interactivity and performance.
- Utilized React hooks and context API to manage complex state and streamline data flow across components.

Projects

CodeBook | *React Js and Tailwind CSS* |

4

- Designed a mobile-friendly UI with Tailwind CSS, ensuring accessibility and usability across all screen sizes
- Leveraged React Router for smooth navigation and dynamic rendering of content, enhancing user experience.
- Utilized React's context API to manage state globally, enabling efficient data flow and component interaction.

Cinamate | *React JS and Tailwind CSS* |

4

- Developed a dynamic movie browsing application in React, allowing users to search, explore, and view detailed information on movies.
- Integrated a movie database API to provide real-time data, including movie details, ratings, genres, and images.
- Designed an intuitive and responsive UI using Tailwind CSS, ensuring seamless usability across desktops, tablets, and mobile devices.

E-Commerce Website | *React JS and Tailwind CSS* |

4

- Developed an e-commerce platform using React, allowing users to browse, search, and purchase products seamlessly.
- Integrated product filtering and sorting functionality, enabling users to refine search results based on categories, price, and popularity.
- Implemented cart and checkout features with local storage, providing users with persistent shopping carts and secure order processing.
